Experience Summary:

- 14 years of overall IT experience including 3+ years of experience in Azure Data Engineering and 7 years of experience as an Informatica ETL Developer in Data Warehousing, ETL/ELT, Cloud Data Engineering.
- Strong expertise in building and optimizing data pipelines, Lakehouse architectures, and large-scale data processing systems using **Azure Databricks, Azure Data Factory (ADF), Azure Data Lake Storage (ADLS), Delta Lake, Medallion Architecture, Unity Catalog**.
- Expertise with **Informatica PowerCenter, IICS**, Delta Lake, Apache Iceberg, Parquet file formats, Oracle, SQL Server, and DB2.
- Specialized in modernizing legacy ETL systems by migrating Informatica PowerCenter pipelines to Azure Data Factory and Databricks, enabling scalable and cloud-native data platforms.
- Proficient in Apache Airflow, Dremio Lakehouse, Bitbucket CI/CD pipelines, and DevOps practices for automated deployments.
- Good understanding of dimensional modeling (Star/Snowflake schema, Fact/Dimension tables) and Medallion Architecture layered approach.
- Strong expertise in database and ETL/ELT optimization techniques including indexing, partitioning, session parallelism, pushdown optimization, incremental processing, Z-Order clustering, and performance monitoring.

Technical Skills:

- Cloud & Big Data: **Azure Databricks, Azure Data Factory (ADF)**, Azure Data Lake Storage (ADLS Gen2), Delta Lake, Unity Catalog
- ETL Tools: **Informatica PowerCenter (9.x/10.x), IICS**
- Programming: PySpark, Python (Airflow DAGs, API integration), SQL, Shell Scripting
- Databases: Oracle, SQL Server
- Orchestration & CI-CD: Apache Airflow, Autosys, UC4, Bitbucket, DevOps CI/CD Pipelines

Professional Experience

- Data Engineer, **Etraveli Group (Gothenburg, Sweden)** | Jan 2026 – Feb 2026
- Azure Data Engineer, **Databees AB (Stockholm, Sweden)** | Jan 2025 – Dec 2025
- Technical Lead, **Tech Mahindra (Hyderabad, India)** | Jan 2017 – Apr 2024
- Associate, **Cognizant Technology Solutions (Hyderabad, India)** | Jan 2016 – Jan 2017
- Senior Software Engineer, **Wipro Technologies (Hyderabad, India)** | May 2010 – Jan 2016

Educational Qualifications

- Master of Computer Applications (MCA) from Jawaharlal Nehru Technological University Hyderabad.
- Bachelor of Science (BSc) from Osmania University, Hyderabad.

Projects Summary

Data Solutions and Engineering | Etraveli Group | Data Engineer

Environment: Airflow, Dremio, Ceph, Bitbucket CI/CD, Python, SQL, ADF, Databricks

- Built and managed end-to-end data pipelines by orchestrating workflows in Azure Data Factory and performing distributed data transformations in Azure Databricks using PySpark and SQL.
- Designed and implemented end-to-end data pipelines integrating REST APIs, databases, and files into Ceph object storage, enabling scalable data ingestion
- Developed and maintained Apache Airflow DAGs to orchestrate ETL workflows using Python and SQL
- Enabled data virtualization using Dremio, improving query performance for analytics and reporting
- Implemented CI/CD pipelines using Bitbucket for automated deployment of workflows
- Collaborated with business and technical stakeholders to deliver analytics-ready datasets

Group Data, Analytics & AI - EAP | SwedBank AB | Azure Data Engineer (Consultant)

Environment: Databricks, Azure Data Factory, ADLS Gen2

- Specialized in Databricks Lakehouse Federation - configured Unity Catalog to federate live queries across ADLS Gen2, Azure SQL, Oracle (legacy), and Snowflake without data duplication or ETL
- Implemented cross-catalog federation enabling business users to query different sources through single Databricks SQL interface - eliminated 80% data copying costs
- Collaborated across data engineering teams to validate Databricks integration within production ETL flows - successfully tested Delta Lake tables, notebooks, and Unity Catalog governance
- Orchestrated Azure Data Factory pipelines calling Databricks notebooks
- Documented integration patterns, test results, and best practices enabling Databricks adoption roadmap

Data and Analytics Engineering | Databees AB | Azure Data Engineer

Environment: Databricks, Azure Data Factory, ADLS Gen2, Informatica Power center

- Migrated legacy Informatica power center workflows to Azure Data Factory and Databricks (PySpark), enabling scalable and cloud-native data processing
- Implemented SCD Type 2 pipelines using Delta Lake MERGE operations, ensuring historical data tracking and consistency
- Designed and orchestrated Azure Data Factory pipelines for end-to-end data integration
- Configured Unity Catalog for secure data governance and cross-platform data access (ADLS, SQL, Oracle, Snowflake)
- Enabled Lakehouse Federation, reducing data duplication and improving data accessibility

Swiss Re T&M Services-USA | Swiss Re Management (US) Corporation | Senior Informatica Developer

Environment: Informatica Power Center, DB2, Oracle, UC4 Scheduler, Azure Data Factory

- Developed, enhanced and deployed Informatica objects to process data into BI layer for Moody's reporting.
- Gathered requirements, managed UC4 scheduling, error handling and support.
- Development of ETL mappings, Code review, and tuning of Informatica routines for performance improvement.

- Provided production support, optimized ETL and DB objects and ensured data accuracy and consistency
- Led the migration of data pipelines from Informatica Power Center to Azure data factory as part of cloud migration.
- Mentored team members and collaborated with business stakeholders to deliver high-quality data solutions

VJ Enhancement and Support | VIDEOJET Technologies | Informatica Senior Developer

Environment: Informatica Power center, IICS, Oracle, SQL Server, Salesforce

- Migrated Informatica PowerCenter workflows to IICS (Informatica Intelligent Cloud Services) by importing XML mappings, configuring connections, and validating end-to-end data flows
- Developed complex ETL mappings including SCD Type 2 implementations using IICS transformations (Lookup, Expression) for manufacturing datasets (customers, products, pricebooks)
- Built and delivered deployment packages (including mappings, dependencies, and parameter configurations) to support seamless production releases
- Performed unit testing and data validation to ensure data accuracy and consistency across source and target systems
- Maintained migration tracking documentation, including status, issues, and resolutions, ensuring traceability and audit compliance

HKFRS 15 Implementation | SMARTONE Telecom | Informatica Senior Developer

Environment: Informatica PowerCenter, Oracle, UNIX

Scope: Processed flat files/tables to Oracle for ARRE interface.

SI KM Core | Selective Insurance | Informatica Senior Developer

Environment: Informatica PowerCenter, SSIS, SQL Server, ASG ZENA

Scope: ETL from CRM/files/downstream to CRM/reporting.

HBO Now CRO Data Mart | HBO | Informatica Developer

Environment: Informatica PowerCenter, UNIX, Oracle

Scope: Ingested device/subscription data to Oracle.

Data Quality Initiatives (DQI) & Centralized Accounting Layer (CAL) | UBS | Informatica Developer

Environment: Informatica PowerCenter, UNIX, Autosys, Oracle

Scope: Cleansing/onboarding for client data; trading/accounting validations.
